

Document Information	Version: Flyme Auto 1.3.0 Applicable Model(s): Geely EX5 Update Contents: General Update Approximate Size: 5GB Approximate Download Time: 30 mins Approximate Installation Time: 30 mins Release Date: 12/10/26
----------------------	---

Dear Geely Customers,

An Over-the-Air (OTA) update will be available from Monday, 12th October.

This applies to all Geely EX5 models. This update will improve your experience with your Geely product, improving on current software features, driving features and useability functions.

Summary

- Driving assistance optimisations:** When intelligent cruise control (ICC) is activated, deceleration in curves is improved with increased smoothness and less frequent corrections.
- UI Integration for connected devices:** When set, the around-view monitor pop-up window activates without minimising Apple CarPlay or Android Auto.
- Enhanced language packs:** 19 new system languages and 8 voice languages (including Italian and Portuguese). After switching to a new system language, you can download the corresponding voice resource package Please note: you will need to download the corresponding language package after switching to a new system language.
- ADAS improvements:** Softer audio indicator volume for seatbelt reminders, speed limit warnings, and reverse radar.
- FlyMe Multimedia updates:** Radio app now includes a 'favourites' function, allowing one-click saving of frequently used stations.
- New theme wallpapers made available.
- Several additional functions and services have been refined to improve overall user experience.

We look forward to you enjoying these upgrades.
